- Corporate Mergers and Buyouts
- Office Relocation
- Maintenance and Repair
- Day to Day Procurement Activities

We
Can
Help

Safely disposing of your old electronic equipment and other used assets is Our Business.

We are a responsible electronic recycler, registered with the Georgia EPA.

We offer professional custom electronic recycling, repurposing and disposal.

In business over 10 years, we process thousands of assets each month from Fortune 500 companies, school systems, data centers and corporations nationwide.

Our professionals can devise a competitively priced solution to meet your needs.

We understand your need to efficiently clear the clutter and make room for new technologies without exposing your company, customers, clients and vendors to risk.

We build long term relationships where we develop interlocking processes.

IT Equipment Buyouts

TBF Computing pays top dollar for old equipment. We come to your location and inventory your equipment or you can send us an inventory list. We work with you to collect just the right amount of information to make an informed bid. We want to pay top dollar for re-marketable assets from our best sources. It is easier to keep a good source than to find ones.

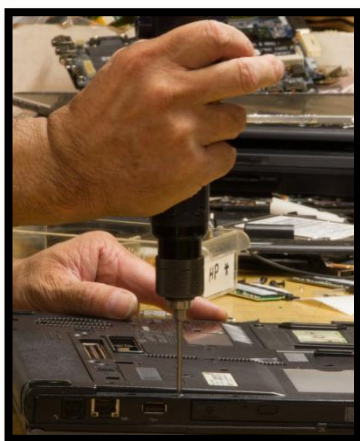

IT equipment De-Installation

In some cases, our technicians are contracted to de-install electronic equipment from offices or data centers. We stage and safely prepare those assets for shipment to our warehouse. Give us a call if you need trained hands to help with major moves.

Fast Pickup and Logistics

TBF Computing is a nationwide service provider. We specialize in companies with multiple locations - no matter how many. We use our own company trucks to service companies within a few hundred miles of Atlanta. For more-distant jobs, we utilize a proven network of freight logistics specialist.

Auditing, Testing & Repair

We process, sort, and test your equipment at our warehouse in Marietta, Georgia. We test functionality, repair equipment as needed, and break down scrap equipment. Everything is sorted and prepared for repurposing, demanufacturing, destruction or resale. We comply with all local and national regulations for the safe disposal and repurposing of your equipment.

Complete Audit

We offer flexible audit levels to meet the requirements of our customers. Our detailed inventory list provides brand, model, serial number, all asset tag numbers and other predetermined information. We have developed an integrated custom inventory database application to quickly adjust these reports to meet your needs.

Data Destruction Guarantee

As technicians process your equipment, they destroy all traces of your data. We use NIST recognized DBAN software with three pass erasure and verification. Failed or customer specified hard drives and all other magnetic media are shredded on site. We provide each customer a Certificate of Data Destruction which can include scanned serial numbers.

Onsite Shredding Services

TBF is your one source for Data Destruction, Electronics Decommissioning and Asset Disposal. We provide a single point of contact. We take responsibility for timely and safe off-site and onsite data destruction of Hard Drives, Optical Media and Tapes. Our technology allows full recording of the destruction process including serialization and, if necessary, video records.

Recycling

We process most scrap equipment at our facility in Marietta, GA. Computers, printers, and monitors are broken down into their base components: steel, aluminum, plastic, circuit board, glass, and copper. We are careful to only deal with downstream R2 certified vendors who meet our high standards.

Remarketing

We re-market your equipment to end users and wholesalers worldwide. To give you the best deal, we maintain a large customer base in multiple markets. We get top dollar for your equipment. All exports comply with applicable laws and regulations. Materials that require R2 certified disposal are only shipped to our trusted downstream partners in the United States.
